

Wastewater pump with stainless steel housing

Wastewater pump with stainless steel housing, IP 68

Electrical pump for removing water out of decontamination showers for example, suitable for continuous operation. It can deliver fresh water as well as wastewater with a maximum solid size of 3mm.

The suction pump has a water level sensor with leaves only a rest water level of 2mm in the housing. Supplied with a 5m cable the pump is mounted together with the sensor in a stainless-steel box, which securely prevents the intake of bigger pieces as well as suctioning to the bottom

The standard coupling is a Storz D, but any other coupling is available on request.

Flow rate:	10.000 litres/h maximum
Driving speed:	2850 per minute
Max. delivery height:	8,0 m
Max. discharge temperature	35°C
Supply voltage (50 Hz):	230 V
Motor power:	500 W
Switch-on water level	5 mm
Follow-up time	4 minutes
Base area:	230 x 230 mm
Weight	8,7 kg
